

AIP Execution and Transparency - Add tags for completed / not completed, funded / not funded

1. for completed / not completed

Then it is easy to sort the ones with implementation updates or not.

1. funded / not funded

Just because an AIP passes it doesn't mean they have the funds. We should have a tag for when the AIP has actually received the funds. Also we should update this section with the date the funds are received in the post.

Seems like a no brainer improvement for the forum.
