

Queries

pub

enum

QueryMsg

```
{ /// The contract's configurations Config
```

```
{ } , /// List of pending funds to addresses (to be distributed) Pending
```

```
{ } , /// List of current shareholder weights Shares
```

```
{ } , /// Returns pause state info - whether contract is paused and if it is, until when PauseInfo
```

```
{ } , }
```

Config

Returns current config of contract. Config has a following schema:

pub

struct

Config

```
{ /// Denom used for rewards distribution. All funds in any other denoms will be ignored. pub denom :
```

```
String , /// The address of the Neutron DAO. It's capable of pausing and unpausing the contract pub main_dao_address :
```

```
Addr , /// The address of the DAO guardian. The security DAO is capable only of pausing the contract. pub  
security_dao_address :
```

```
Addr , }
```

Pending

Returns an array of(address, amount) pairs of pending rewards to be distributed among all shareholders.

Shares

Returns an array of(address, weight) pairs of shareholders' weights.

PauseInfo

Returns enum describing whether contract is paused, and if it is, also returns the height until which it is paused:

pub

enum

PauseInfoResponse

```
{ Paused
```

```
{ until_height :
```

```
u64
```

```
} , Unpaused
```

```
{ } , } Previous Messages Next Overview
