Abstract Summary:

This proposal aims to expand the ApeCoin DAO ecosystem through the creation of an animated series pilot and three spin-off comic books, featuring characters owned by ApeCoin DAO holders. We envision a gritty, action-packed, and comedic, anime-inspired adaptation of the American Ape comic book series that prominently features ApeCoin as the primary currency of the Metaverse, reaching beyond the echo chamber of “Crypto Twitter” that is primed to be pitched directly to international streamers via our producing team’s existing development, production and distribution pipelines.

Overall Cost:

\$300,000 USD
