

Hi everyone, Staky validator here!

We have recently jumped in the Secret network and we are glad to introduce our staking platform MVP.

[Staky.io](https://staky.io) will allow you to track your SCRT addresses and review all your rewards claims and SCRT balances! The platform is currently in Alpha, we are planning to bring a lot more features such as :

- Balances evolution chart
- Governance smart contract, that will allow our delegators to actively take part in our decision making by voting with their addresses directly from the platform! With aims to be 100% community driven in the middle-term.
- Telegram bot, that will keep you updated with latest SCRT news and rewards arrival!

We are counting on you to provide feedback so we can iterate and provide you the best staking experience! You can follow us on twitter : [https://twitter.com/staky\\_validator](https://twitter.com/staky_validator)

Once our Staking platform development will be completed, we'll be 100% focused on contributing on the PoS ecosystem we're validating! We're designing an interactive Smart Contract education platform that will expand and educate the SCRT developer community! More news soon
