

## zkFlow

Track your wallet and see Volume you traded on different protocols and blockchains

Try at <https://zkswap.finance/zkflow> or <https://zkflow.info>

zkFlow is a comprehensive wallet analytics platform that empowers users to track their on-chain activity across various protocols & blockchains. It provides a holistic view of user interactions, encompassing transaction history, volume traded, and network statistics.

### Key Features:

- Multiple networks support
  - : currently includes zkSync, Scroll, Linea, Base, Mantle, and zkEVM.
- General Wallet History Tracking
  - : View your number of transactions, total volume, fee spent, etc.
- Protocol-specific Wallet History Interactions
  - : your number of interactions, last activities, volume, etc.
- Check Airdrop Eligibility Simulator
  - : A simulation for illustrative purposes based on Arbitrum's airdrop criteria to help users to optimize for the potential airdrops from of corresponding networks.
- Support Multiple Wallet Management:
  - zkFlow supports up to 100 wallets of each person.
- Intuitive Interface
  - : Navigate zkFlow's user-friendly interface to easily access and analyze your wallet activity data.
-
