

Hi all - duncand from [Boardroom](#) here

Part of Boardroom's mission is to increase informed participation in governance. In partnership with Aave Grants DAO, we are providing here a weekly recap of recent governance activity in the Aave community. This is intended to be complementary to [Aave News](#) as well as to Messari's [Aave Weekly](#), even with some overlapping content. While Aave News is inclusive of broader protocol news, and Messari's update largely focuses on metrics, this recap will focus exclusively on governance (much like our coverage of Optimism governance [here](#)). We believe this will be useful for delegates and voters due to the often rapid pace of governance news and updates. When appropriate we'll also note a few specific areas for action on timely subjects.

Within our weekly recap, we'll provide a look back at:

- Proposals
- Governance changes
- Impactful operating suggestions, and
- Critical governance-related discussions across Discourse, Twitter, and Discord

The first recap will be posted today. We'd love to hear your feedback and any suggestions you might have. Feel free to DM to set up a time to chat!
