

Applications

Most updated information: <https://sct.network/ecosystem/dapps>

Bridges

- [Secret Bridges](#)
- - Implementation of the Axelar EVM bridge to Ethereum, Polygon, Avalanche, Arbitrum and more
- *
- [Secret Monero Bridge](#)
- (not working as of right now, please do NOT use)
- - Turn XMR into the SNIP-20 sXMR
- *
- [IBC Bridges](#)
- - Transfer tokens across IBC networks and wrap them in SNIP-20 tokens
- - - Alternate UI for [IBC bridging](#)
- - - and [SNIP-20 wrapping](#)
- - - of IBC tokens, by [Sienna](#)

-
- *
 - Andromeda Protocol
 - - Message passing solution over IBC with no-code digital objects for novel Application creation
 - *
 - [Axelar GMP](#)
 - - Message passing bridge for EVM
 - [Bidshop](#)
 - - Permissionless fast finality PAAS messaging bridge
 - [XP.network](#)
 - - Secret NFT bridge to EVM and other networks like Near/polkadot
 - Router network - General message passing bridge for EVM
 -

DeFi

- [Shade Protocol](#)
- - An array of connected privacy-preserving DeFi applications
- - - Shade
- - - - Governance token and staking for protocol revenue

-
- - - SILK
 - - - - Overcollateralized stable coin pegged to a basket of assets with transactional privacy by default
-

- - - ShadeSwap
 - - - - AMM with protocol owned liquidity in mind
-

- - - SHD bonds
 - - - - Purchase discounted SHD by providing LP shares.
-

- - - STKD-SCRT
 - - - - staking derivative for the SCRT token
-

- *
 - [Sienna Network](#)
 - - Front running resistant AMM
 - - Private lending application
 - *
 - [Button Swap](#)
 - - AMM/DEX aggregator by [btn.group](#)
 - - - Limit orders available as well
-

- - password manager, Viewing key wizard and more
- *
- [StakeEasy](#)
- - Privacy preserving liquid staking solution for Secret Network. With a compounding and non-compounding Staking derivative seSCRT and bSCRT.
- *
- [Bidshop](#)
- - Polygon based Auction platform using Secret Privacy as a Service for gamified auctions.
- *
- [Blackbox](#)
- - A 2 legged application for transactional privacy on Secret Network
- *
- [AmberDAO](#)
- - Private store of Value token
- *
- [YOIU launchpad](#)
- - Launchpad for SNIP-20 projects with community governance
- *
- [Fina.cash](#)
- - Debit card with SCRT for Payments and mobile wallet

- *
- [Kado.money](#)
- - Global Fiat onramp with SCRT
- *
- [HoudiniSwap](#)
- - Swap privately into SCRT using Monero obfuscation
- *
-

NFT

- [Stashh](#)
- - Marketplace for Secret NFTs
- *
- [Legendao](#)
- - Mint to earn NFT launch platform with a native collection and Token
- *
- [Anons](#)
- - First NFT project to launch on the network. Only 580 anons [Twitter](#)
 - and [Contract](#)
- *
- [Tarantino NFTs](#)
- - Seven uncut scenes from the original Pulp Fiction manuscript
- *
- [Killroy was Here](#)
- - The first feature film launched as an NFT by Kevin Smith
- *
- [V-IRL](#)
- - A platform and tooling to bridge real-life assets to SecretNFTs while maintaining user privacy
- *
- [Actilist](#)
- - NFT marketplace with Novel auction methods
- *
- [Secret Admirers](#)
- - On-chain OnlyFans using Secret NFTs
- *
- Eqoty
- - on-chain Spotify leveraging Secret NFTs
- *
- [Lorem Ipsum](#)
- - Metaverse with Secret NFTs
- *
-

Other

- [Prifi Labs](#)
- - The locker - Mnemonic seed phrase backup solution
 - The shield - Secures EVM contracts using Secret PAAS
- *
- [Serenity shield](#)
- - Inheritance and security solution for Mnemonic seed phrase backups
- *

- [Primevault - Excheqr](#)
- - MPC wallets using Secret PAAS
- *
- [Obi.money](#)
- - MPC wallets and walletless onboarding using Secret PAAS
- *
- [Fardels](#)
- - An decentralized social network for access-control to content with a payroll
- *
- [Altermail](#)
- - A decentralized user-side encrypted Communication platform with e-mail, (group) messaging and video calls + in-game communication coming soon.
- *
- [Whisprs](#)
- - Decentralized, cross-chain, private Messaging, by core-dev [Cashmaney](#)
- *
- [Secret time capsule](#)
- - a blockchain-based dApp to send cache of information and/or SCRT coins to the future
- *
-
- [DataVault](#)
- - A data marketplace and payroll application for any online content built leveraging Secret Network for encrypted escrow contracts
- *
-

Games

Notable games built on the network include:

- [Secret Dreamscape](#)
- by Digiline ([Blog](#)
-)
- - A social multiplayer game that's like a mashup of poker and scrabble. The cards are rich with fantastical images that take the player somewhere between a dream and reality. Players can bring their personal deck of NFT cards and their played words to the cards as they play for chances to win from the community prize pool.
- *
-
- [Onenet \(Bushi\)](#)
- - Gaming platform building an on chain FPS (first person shooter) called Bushi
- *
- [Prisnr.games](#)
- - Head-to-head strategy game on testnet invoking the prisoner's dilemma. Implements private entropy pool for random numbers and secretNFTs as rewards and playable in-game power-ups. ([Contract codebase](#)
 - ,[Front-end webapp code](#)
 -)
- *
- [Secret Heroes](#)
- - Deck building, auto-battler game based on collectible secretNFTs, built in Unity
- *
- [Secret Holdem](#)
- - Texas Holdem game on testnet ([Codebase](#)
 -)
- *

- [Rock Paper Scissors](#)
- - Rock paper scissors game without commit-reveal on testnet ([Codebase](#))
- -)
- *
- [AART Blackjack](#)
- - A full dledged Blackjack online app using Secret-VRF
- *
-
