Dear Arbitrum Community,

We're excited to announce that the [Curia Arbitrum Analytics Dashboard

](https://arbitrum.curiahub.xyz/) is now live!

What is the Arbitrum Governance Analytics Dashboard?

A comprehensive tool that promotes transparency, evaluates participation, and fosters integrity in Arbitrum's governance. It provides insights into key governance metrics:

- Holder Metrics

: Analyze ARB token distribution, including total holder wallets, circulating vs. votable supply, and the share of votable tokens.

- Voting Power Metrics

: Explore the decentralization of power with data on small vs. large holder influence, delegate quorum levels, and the Nakamoto Coefficient.

- Participation Metrics

: Assess delegate activity, including trends in voting power, participation rates, and engagement in governance proposals.

- Proposal Metrics

: Dive into proposal types, categories, outcomes, and proposer activities to understand community-driven decision-making.

- Delegate Metrics

: Track delegate rankings, power shifts, delegator counts, and turnout, spotlighting the key contributors to governance.

- Delegate Profiles

: Review delegate performance with data on delegated tokens, voting behavior, participation rates, and independence.

- Voting Behavior Analysis

: Discover trends and activity patterns through period density heat maps and voting momentum across proposal lifecycles.

This dashboard simplifies complex governance data, enabling informed decision-making and a clearer understanding of the Arbitrum governance ecosystem.

Got ideas, feedback, or an interest in contributing to Arbitrum Governance? Share your thoughts in our Telegram group or drop a comment below—we'd love to hear from you!
