Airdrop Distribution Plan

Should ZeroLend receive governance tokens designated from any of the respective airdrops, we have designed a distribution plan designed to benefit our loyal community members and support the ongoing development of our ecosystem:

1. 40% to ZERO Token Holders
2. : A substantial 40% of any governance token airdrop will be allocated to ZERO token holders (with a preference to ZERO stakers). These individuals have played a pivotal role in the growth and success of ZeroLend. This includes early ZERO holders as well.
3. holders as well.
4. 40% Reserved for Future Incentives and Initiatives
5. : We believe in continuously incentivizing and driving the growth of our ecosystem. As such, 40% of the airdrop will be reserved for future incentives and initiatives, ensuring that our community members continue to be rewarded for their active participation.
6. 20% for the Development Fund
7. : Innovation and sustainability are at the core of ZeroLend. To support ongoing development efforts, 20% of the governance token airdrop will be allocated to our development fund. This ensures that we have the necessary resources to maintain and enhance our platform.
- 8.
