

As you know, six months have passed since the airdrop. What do you think about it:

- Was it positive for the project?
- Have you achieved the initial objectives of the Governance group?
- Did the number of users increase?

-It has been a success?

- Should it be repeated when it is one year old?

In my opinion, all the answers are yes. I hope many have the same opinion.

I await your comments

A hug to all
