

Banxa

Summary

At Dynamic, we make it incredibly simple to add a Fiat onramp solution to your SDK integration. We are currently working with [Banxa](#) and other great onramp solutions will be made available soon.

Usage

To enable an onramp solution:

1. Go to your developer dashboard and go to the [Configurations](#)
2. page.
3. Go to the Onramp Providers
4. Card
5. Review and agree
6. to Banxa's Terms and Conditions.
7. Once confirmed, enable the Banxa onramp provider. 1. Note: if you enable it on Sandbox, then you'll be using Test Order. Reference Banxa's test information so you can easily [test in sandbox](#).

You're done. In the Dynamic widget, users will now see a "Buy" button that will open up a fiat onramper iFrame.
