[0xGonzalo](#) here

, founder of the onchain art collective [MusicaW3](#). For those who don't know us, MúsicaW3 is a community of independent Latin artists dedicated to offering free, high-quality education to musicians and creators across Latin America.

I'm excited to share with you our Collective Drop, launched as part of the Quick Grants program from Oasis Onchain and Thank Arbitrum. It dropped this Monday, October 7th, on Zora via the Arbitrum chain.

A collective drop is a compilation collection featuring various Argentine artists, capturing an audiovisual record of one of the events we hosted with MusicaW3 in Buenos Aires.

I invite you all to enjoy the collection, and feel free to share and collect it if you like it.

We believe that opportunities like these are crucial for the sustainable development of Latin American onchain creators. In just the first 24 hours, we've gathered over 120 mints and received great exposure on X.

We're thrilled to contribute to the Arbitrum network and share art on it.
