Orbem Wars is a tower defense game that has

- strong emphasis on PVP, utilizing the privacy of NFTs to not leak any strategic data on-chain
- ranked multiplayer events
- a unique method to onboard new players without any upfront cost

You can play Orbem Wars without SCRT, without a Keplr wallet, without knowing what Bitcoin is, yet still earn SecretNFTs through gameplay. This allows us to deploy native applications to, for example, the Google Play store. Potentially onboarding (tens, hundreds) of thousands of players.

You can download Alpha 4 with these links, consider joining our Discord for tips and tricks as the Alpha version does not have an integrated tutorial yet.
