

Hey guys, It's the delegate Hiturunk here with Penguin Party! I thought I'd give penguinparty.eth , PenguinParty's multi-sig for voting, it's own page.

You can keep up with our latest information at:

Fish Scoreboard: <https://penguinparty-eth.github.io/SourceCred-Instance/#/explorer>

Discord: <https://discord.gg/XscWVvH>

Medium: medium.com/@Hiturunk

Twitter: <https://twitter.com/PenguinpartyE>

Twitter: <https://twitter.com/HiturunkE>

Youtube: <https://youtube.com/channel/UCvcz0jSa65MZSQMB3hMNAkA>

Github: <https://github.com/penguinparty-eth/>

Codecks: <https://open.codecks.io/-penguinparty/>

We at Penguin Party are running a multi-sig with three co-delegates (I'm one of them!) and developing an application to interact with Uniswap governance. As well, we developed and deployed the Uniswap implementation of Autonomous Proposals.

We are the only Decentralized Delegation on Uniswap, and we are totally community-run.

Anyone can join us in our discord and begin contributing to the future of Defi governance with a slew of feature-rich discord integrations to ensure the community gets a say in our development. :)

You can delegate to the multi-sig easily by following this handy guide!

The address is, of course, our ENS: penguinparty.eth
