

I just had all of my staked Eth stolen. The hacker does not have access to my wallet, THEY initiated these transactions, not me.

Here is the transaction hash: 0xabe6466dab7e4b4449a311a581e8e1dcdcd76925bbd17680b57595ced498e888

The contract they used is:

0xd22c732f42dafc35d63a16052f858224778fbfd3

My wallet is 0xab2ffb05d5c309b6f90212f380dab8b2c71b9b6c

WTF happened?
