

# Installing Core Kit SFA Node SDK

## [@web3auth/node-sdk](#)

[a](#)

- npm
- Yarn
- pnpm

npm install --save @web3auth/node-sdk yarn add @web3auth/node-sdk pnpm add @web3auth/node-sdk

## Consider adding@web3auth/base

to your project[a](#)

- npm
- Yarn
- pnpm

npm install --save @web3auth/base yarn add @web3auth/base pnpm add @web3auth/base This package gives access to common types and interfaces for Web3Auth. This comes in handy by providing you a standard way of importing the values you need to work with the SDKs. We highly recommend using it while working withTypescript .
