

About ACI

Established in early 2023, ACI stands as one of the driving forces within the Aave ecosystem. As the primary delegate of the Aave DAO, ACI is deeply committed to turning ideas into tangible results. With a strong focus on implementation, ACI leads key initiatives such as the Frontier Staking Program, the Skywards Program, the Dolce Vita Program, the Merit Program, and the Orbit Program. ACI are also active delegates in numerous other DAOs including: Arbitrum, Lido, Gnosis, EtherFi, ZKsync, and Ethena.

ACI is not just about voting on proposals—our team actively contributes code and expertise to realize governance initiatives. We bring hands-on experience from managing Aave's most critical programs, ensuring that governance processes are smooth, efficient, and impactful. We have extensive experience working with many of the Service Providers in the DeFi governance space and have an internal team of developers, governance experts, and risk analysts.
