

Hi guys! I hope there is also a staking option for loyal UNI holders to earn more UNI just by holding UNI in their personal wallet. Since hodling UNI in our personal wallet doesn't gets hodlers a chance of passive income but only gets value appreciation overtime which is for me it takes time before someone able to see and appreciate their rewards for holding UNI in regard to its price increased. This is just my simple opinion. Thanks and more power to UNI and the brilliant people behind UNISWAP project.
