

Overview

We are thrilled to announce the launch of the [Aave Asset Listing Portal](#), a tool built into the Chaos Labs Parameter Recommendation Platform to support the onboarding of new assets to the Aave protocol. The Asset Listing Portal is designed to help streamline community decision-making by presenting key metrics about the considered assets, such as volatility, exchange liquidity, market cap, on-chain activity, and the initial risk parameter recommendations for the considered assets by Chaos Labs.

The Aave Asset Listing Portal is another tool in the hands of the Aave community, increasing visibility and providing users with access to a wide range of data to support decision-making. With this tool, the Aave community can onboard new assets more efficiently and enable the protocol to continue to grow and expand its ecosystem while maintaining its position as one of the most innovative and forward-thinking DeFi protocols in the market today.

Platform Deep Dive

The Aave Asset Listing Portal is integrated into the parameter recommendations dashboard. You can access the tool [here](#).

New Asset Listings

The main recommendation section offers a comprehensive view of all the suggested assets. Here, users can find an overview of the proposed assets, including the current status of the Market Cap, Trading Volume, and the original proposal date. Finally, the last column offers a convenient link to the corresponding proposal on the governance forum.

With this organized and accessible presentation of key metrics and data points, users can make well-informed decisions when considering which assets to onboard.

To learn more about specific assets, users can click into the different rows, which will take them to a dedicated Asset page, diving deeper into specific data and recommendations by Chaos Labs for that asset.

Asset Recommendations

The Asset page provides a wide range of information and data points about the asset to support community discussions when considering onboarding it.

The page header has relevant information about the asset, including links to the project page and governance proposal for additional context. Chaos Labs' recommendations for the asset risk parameters are presented at the top of the page.

Next steps

Launching the Aave Asset Listing Portal is another significant milestone in our work with the Aave community. By consolidating key metrics and data points on each proposed asset, the portal empowers the community to make well-informed decisions regarding which assets to onboard, leading to a more reliable and streamlined process and bolstering Aave's ongoing expansion.

We encourage the Aave community to explore this new dashboard and contact us via [Twitter](#) or email aave@chaoslabs.xyz with any questions or comments. We welcome your feedback and would love to hear if there are any features you would like to see!
