

We believe it is important at this moment, when there is such a relevant debate about the incentive program, that it can be discussed broadly before approving its continuation. As Dragon Stake, we are going to vote no, although this doesn't mean we are against [@chaoslabs](#) being able to implement them. We believe that a vote that has generated this level of debate should not be held in August and over a weekend, as it is a period that is not optimal in terms of the availability of many token holders. We think it should be canceled, and an attempt should be made to set voting dates that allow for a broader debate, as approving it would close the possibility for changes and discourage further discussion. I think it is important in these matters to review delegations so that they can be aligned with what is being considered.
