

# APIs

You can get your Bundler URL from the Biconomy [Dashboard](#) . This is the same endpoint URL used for all the networks. All requests must follow the [JSON RPC](#) specifications.

info This documentation is for using our Bundler API directly. If you are building with the Biconomy SDK you can follow the instructions on this [page](#) .

You can test these endpoints on our [Bundler Explorer](#) . ## [Estimate UserOperation Gas](#) [eth\\_estimateUserOperationGas ##](#) [Send UserOperation](#) [eth\\_sendUserOperation ##](#) [Get UserOperation Receipt](#) [eth\\_getUserOperationReceipt ##](#) [Get UserOperation by Hash](#) [eth\\_getUserOperationByHash ##](#) [eth\\_chainId ##](#) [Get Supported Entry Points](#) [eth\\_supportedEntryPoints ##](#) [Get gas fee values](#) [biconomy\\_getGasFeeValues ##](#) [biconomy\\_getUserOperationStatus ##](#) [API Explorer](#) You will need a Bundler URL from your dashboard to use the explorer. Create a userOp and paste it here. [Previous Methods](#) [Next Estimate UserOperation Gas](#)
