

Broadly, I want to get a sense of the actors upstream - builders and searchers, for example.

I know Flashbots is allowing any builder to connect to their relay - is it a fair assumption that all of the major relays - bloXroute, Blocknative, Eden, Manifold, etc - have builders connected to Flashbots relay?

I am just wondering if there is a public list maintained anywhere of builders connected to FB relay. My assumption is that, at best, there is a list of addresses.
