

Otherside KODA - \$APECOIN Airdrop

To ensure that all holders of these Otherside KODA NFTs have access to the resources they need to fully participate in the Otherside Metaverse, it is important to airdrop \$APE coin tokens to them.

The Otherside Kodas NFTs represent a very unique and valuable asset within the Otherside Metaverse. These tokens can be used to purchase additional virtual land, as well as other items and services within the Otherside and Marketplace. By airdropping \$APE tokens to holders of Otherside Kodas, we are providing them with the necessary resources to fully engage with and contribute to the metaverse. This will ultimately lead to a more vibrant and active community, and will help to drive the growth and success of the platform. Perfect example of how BAYC community exploded and continues to thrive because of these massive incentives for holding their key assets. Kodas are the face and driving force on their biggest project to date, The Otherside! What better way to promote the brand by incentivizing the Koda Holders just like BAYC, MAYC and BAKC.

Additionally, the airdrop of \$APE tokens will also help to increase the liquidity of the Otherside Koda NFTs, as holders will have a means to acquire new NFTs within the Yuga ecosystem with these tokens. This will also help to increase the overall value of these NFTs, making them even more desirable and valuable assets within the metaverse. In summary, the airdrop of \$APE tokens to holders of Otherside Kodas is an important step towards creating a thriving and inclusive metaverse community. It will provide holders with the resources they need to participate in the economy and community, and will ultimately lead to the growth and success of the platform.

There are several benefits to airdropping \$APE tokens to holders of Otherside Kodas. Some of these benefits include:

1. Increased participation and engagement within the metaverse: By providing holders with the resources they need to fully participate in the economy and community of the metaverse, the airdrop will lead to a more active and engaged community.
2. Facilitation of trades and transactions within the metaverse: The \$APE tokens can be used to purchase new virtual land, as well as other items and services within the metaverse. This will facilitate trades and transactions, which in turn will help to drive the growth and success of the platform.
3. Increased value of Otherdeed NFTs: The airdrop of \$APE tokens will also help to increase the liquidity of the Otherside Kodas, as holders will have a means to acquire new NFTs with these tokens. This will also help to increase the overall value of these NFTs, making them even more desirable and valuable assets within the metaverse.
4. Attracting new users: Airdropping tokens to holders of Otherside Kodas will help to attract new users to the platform, as they will be able to see the value and potential of the metaverse.
5. Building a Stronger community: The airdrop will also encourage holders to hold on to their NFTs for longer, which will strengthen the community and create a more stable ecosystem.
6. Fostering a sense of ownership: The airdrop will help to foster a sense of ownership among holders of Otherside Kodas, as they will see the value and potential of the metaverse.

Cost of Airdrop: \$APECOIN airdrop could consist of anywhere from 3500-4500 \$APE. This can be determined at a later date as well!

Overall, the airdrop of \$APE tokens to holders of Otherside Kodas is an important step towards creating a thriving and inclusive metaverse community. It will provide holders with the resources they need to participate in the economy and community, and will ultimately lead to the growth and success of the platform. I believe this will have the same outcome that BAYC experienced and helped NFTs soar to levels in Web3 that still no other company has even come close too!

YES - 100% would continue to "Diamond Hand" my Otherside Koda #5080

into the Metaverse and Beyond FOREVER!

ETH Address:

0x34aa6c9e5237494dF6F9102467f740376E19825F

Thank you all for all your continued hard work within the ApeCoin DAO and YUGA Labs. Also thank all of you that read my AIP Idea and hopefully it may be implemented into the ecosystem in the future!
