

Sending and receiving assets in CAPE

Send

Step 1: Select “Send” in the left menu. You can then select the asset type that you wish to send by searching for the asset in the search bar.

Step 2: Enter the amount to transfer and the receiver address.

Step 3: Shortly after sending, your transaction will appear in the wallet dashboard, and your asset balance will reflect the updated value in the wallet dashboard.

Receive

Step 1: Clicking on 'Receive' in the side menu will open a popup where you can copy one of your receiving addresses. Alternatively, you can also choose another receiving address to use in the 'Account' page.
