Today we are very excited to announce the launch of Taiko Grants Cycle 2!

Cycle 2 is an expanded version of our inaugural Taiko Community Grant Program ([Cycle 1](#)), for which we announced the [winners](#) a few weeks ago. We have decided to keep a similar format to our inaugural program but significantly expanded both the size (\$30m in total) and scope in Cycle 2 to cover three different tracks — Community, Partner, and RFP.

Our objective continues to be the discovery and support of innovative projects and community members that advance the Taiko ecosystem with the financial incentives and developer resources needed to bring their visions to life.

We're open to whatever feedback you have. Please post it in the comments of this topic!
