

## PROPOSAL CATEGORY

Ecosystem Fund Allocation

## TEAM DESCRIPTION

turja.eth and rogercawdette.eth

[Turja](#) is a software engineer and has been building crypto projects for the last 3 years. [Roger](#) is a product designer and has helped design internal tools for Orange DAO.

## ABSTRACT

The Ape Proposal Generator is an AI-powered tool that allows members of the community to easily create Ape Improvement Proposals (AIPs) with as little as a short description.

For example, you could input something as simple as “a proposal for Ape Park, a theme park powered by Ape Coin” and get a fully formatted, quality proposal. The generator is smart enough to populate the additional fields like benefit to ecosystem, timeline, and cost based on your short description. Although, it’s worth noting that the more details you provide upfront, the less guesses it has to make, and the better the generated proposal will be.

## BENEFITS TO APECOIN ECOSYSTEM

More proposal ideas and more engagement from the community.

Writing AIPs can often take a lot of time and effort. The Ape Proposal Generator uses the superpowers of AI to overcome this barrier and make it easy for anyone to create high-quality AIPs. Our hope is that with this tool, community members feel more encouraged to turn their ideas into actual proposals, get them passed, and contribute to the Ape ecosystem.

## KEY TERMS (OPTIONAL)

N/A

## PLATFORMS & TECHNOLOGIES

The Ape Proposal Generator will be developed as a simple web application.

The frontend is written in React, image generation is powered by OpenAI’s DALL·E 3, and text generation is powered by OpenAI’s GPT 3.5 Turbo.

## STEPS TO IMPLEMENT &

### TIMELINE

An initial version of the proposal generator has already been built and can be accessed at this link <https://village-2jv0n2dnn-tchowd.vercel.app/>

4 weeks

- Bug fixing and additional model fine-tuning to address potential edge cases and improve output quality
- Replace GPT 3.5 with GPT 3.5 Turbo
- Add in image generation functionality powered by DALL·E 3 to help authors enhance the visual appeal of their proposals and get the community excited about their vision
- Add Ape Coin token gating
- Cool animations to give the interface a more polished feel

## COST

20,000 APE

## ADDITIONAL NOTE

We love building cool products that people want. If the community enjoys using the proposal generator and thinks it’d be useful to add additional functionality or have other AI-powered tools, we’d be happy to explore building those too.
