

Hi.

BLUF (Bottom Line Up Front), I sent funds to a previously utilized address from a different wallet account and now it appears the funds are lost in a contract.

Transaction ID:

0x35a6ed734e413a0f39468d4e3b6ca17fcbff980a3f738900b98368dd1bbf6af7

All I wanted to do was to add to my AAVE account... had USDC deposited. Wanted to add FEI. The intent is to submit more funds in the future but if I can't retrieve these funds, it will likely be a deterrent for future transactions.

Your support and assistance is greatly appreciated.
