Arbitrum Forum Communication Thread: [Here](#)

Introduction

Hello Uniswap community, Abdullah and I here! A few months ago, when Arbitrum first airdropped ecosystem projects a significant portion of \$ARB, Uniswap received a little over 4 million tokens. After some healthy discussions on how to allocate and use those tokens, a vote was passed through Uniswap governance to create a Uni-Arb Grant Program (UAGP) and Delegate Program (UADP). See the vote [here](#).

The Uniswap-Arbitrum Delegate Program is the Uniswap community's unique entrance into metagovernance, and Abdullah and I are excited to steward the first 6 months as the committee's delegation facilitators.

Objectives

Abdullah and I have both led university delegate arms (at Penn and Michigan) across 10+ protocols collectively, with participation in hundreds of votes and governance decisions. This thread is a mirror of our delegate community thread on the Arbitrum [forums](#), where we will substantiate the rationale behind our votes and detail any other works related to the UADP.

We will transparently and accountably represent both the Uniswap & Arbitrum communities' interests throughout the governance process. In an effort to be proactive and discerning in our voting contributions, we will ensure that each decision is well-considered and thoroughly researched. Open lines of communication will be a priority, as we plan to regularly share our voting justifications and insights with delegates and community members of both Arbitrum and Uniswap.

Our goal for the UADP is to strive for transparency, efficiency, and broad community involvement.

Disclosure & Waiver of Liability

When applicable, we will disclose conflicts of interest and at times abstain from voting with proper forum rationale. Further, our votes for Arbitrum DAO are our best opinions and should not be considered an agreement on behalf of Uniswap.
