

Depositing

Depositing on dYdX Chain

1. Connect your preferred Ethereum wallet to the dYdX Chain deployment of your choice (e.g. the dYdX Operations Services Ltd. deployment [dydx.trade\(opens in a new tab\)](#))
2.).Support for Cosmos native wallets such as Keplr and Leap coming soon
3. .
4. Deposit USDC to your DYDX chain address. The default onboarding path uses Circle's Cross Chain Transfer Protocol (CCTP) on Noble Chain. You can deposit USDC from many origination chains. Read more [here\(opens in a new tab\)](#)
5. .

User Journeys

Trading via API

Currently, dYdX natively hosts a TypeScript client. 3rd parties were also commissioned to build working Python and C++ clients. All clients are hosted in the [dydxprotocol/v4-clients\(opens in a new tab\)](#) repo.

Client Type Built By [TypeScript\(opens in a new tab\)](#) dYdX Trading Inc. [Python\(opens in a new tab\)](#) Raven DAO [C++\(opens in a new tab\)](#) FastForward Trading via Web
