

I've been exploring the guides for running Sepolia and Taiko nodes, and I'm interested in setting up a node. However, I would like to clarify the staking requirements for running a Taiko node.

[taiko.xyz](https://taiko.xyz)

## **Run a Sepolia node – Taiko**

A decentralized, Ethereum-equivalent ZK-Rollup.

[Run a node]

1. Running a Taiko Sepolia Archive Node (Proposer)

Enabling a Proposer (Taiko Node)

1. Running a Taiko Grimsvoth L2/Eldfell L3 RPC Node (Prover)

Enabling a Prover (Taiko Node)

Claiming Prover Rewards (TTKO/TTKOe)

The guides primarily focus on setting up and configuring these nodes, enabling them as proposers or provers, and claiming rewards.

The guides I've reviewed do not explicitly mention a requirement to stake 32 Sepolia (test) ETH. To ensure I have a complete understanding of the process, could you please confirm whether staking 32 Sepolia (test) ETH is a prerequisite for running a Taiko node?

Additionally, if there are any other staking or token requirements that I should be aware of, I would greatly appreciate it if you could provide that information or direct me to the relevant documentation.

Thank you for your assistance, and I look forward to your response!
