

Hello to all Aave users!

I am happy to announce that we are releasing an alpha version of Projection Finance for Aave V3 Avalanche. Projection Finance is an online tool that allows you to simulate the impact of price changes and actions on a portfolio of assets. The product is initially focused on the DeFi and cryptocurrency market, but it may be expanded to include other types of assets in the future.

We are seeking feedback from Aave V3 Avalanche users to ensure that Projection Finance is useful and easy to use for those who have positions on Aave V3. If you have positions on Aave V3 Avalanche and would like to try out Projection Finance, please do not hesitate to message us for more information.

We plan to open Projection Finance to all V3 markets, including Ethereum, as soon as the protocol is released. We believe that Projection Finance can be particularly useful for Aave users, as they will be able to create projection scenarios by modulating asset prices and know at what threshold they can be liquidated or simply see the evolution of their debt or supply over time and prices.

We hope that many of you will try out Projection Finance and give us your feedback. We are excited to work with you and improve the tool. If you have ideas for new features or encounter any issues while using Projection Finance, please do not hesitate to contact us. We are committed to making Projection Finance a useful and accessible portfolio simulation tool for all Aave users.

In addition to simulating the impact of price changes on your portfolio, we are also working on adding new features to Projection Finance. For example, we plan to add the ability to simulate actions such as borrow, supply, emode, and many more. We believe that these features will be particularly useful for Aave users who want to better understand how these actions can affect their portfolio.

We are excited to continue developing Projection Finance and adding new features to meet the needs of our users. If you have ideas for new features that you would like to see in Projection Finance, please do not hesitate to contact us. We are always open to suggestions and feedback from our users.

Finally, we want to thank all those who have supported us so far (Aave Grants, Aave Company, Leverageux, users, partner's,...) and helped us develop Projection Finance.

We look forward to continuing to work with you and helping you achieve your investment goals on Aave.

Thank you again for your support and we hope to hear from you soon!

Don't hesitate to fill in the typeform on the website to access the alpha
