

## Abstract

Dapps over Apps is an organization that aims to educate traditional developers, tech enthusiast and creative builders about web3 and the potentials of building with blockchain infrastructure.

## Motivation

We are solving the problem of lack of visibility. 9 out of 10 developers in Africa are unaware of Arbitrum developer's friendly infrastructure and its attributes.

## Our Mission:

Bridging the gap between traditional developers, tech enthusiasts, creative builders and blockchain technology.

Our aim with Arbitrum is to establish a community of developers, project founders, web 3 enthusiasts and creative builders in Africa. This grant will be channeled into the following:

- Organizing a global conference for Arbitrum in Africa with 2,000+ attendees
- Organize hackathon focused on building real-life solution affecting Africa and the world at large utilizing Arbitrum.
- Establish an active community of Arbitrum builders and web 3 enthusiasts.
- Workshop and training on how to build dAPPs utilising Arbitrum.
- Organize start-up pitch contest for businesses and projects in Africa looking forward to integrating with Arbitrum.
- Organize hackathon focused on building real-life solution affecting Africa and the world at large.
- Educate and train newbie about the basics of web3 and blockchain.
- Create awareness for Arbitrum blockchain technology to at-least 40% of 85,000 developer in Nigeria.

## Our Traction:

- Organized Dapps over Apps conference 1.0 one of the biggest web 3 conferences in Africa with over 500+ attendees of blockchain & web 3 enthusiasts, traditional developers and creative builders. [Dapps over Apps Conference in Lagos - YouTube](#)
- Onboarded 1,500+ traditional developers and non-developers in Nigeria

into web 3

- Built a running database of over 700+ developers and non-developers in Africa
- Organized workshops for decentralized application training for over 400+

web 3 enthusiasts and traditional developers. [Intro: How to build your Decentralized application \(Henry Onyebuchi\) - YouTube](#)

- Organized a [start-up pitch competition](#) to encourage builders to integrate blockchain technology to their businesses and projects.
- Organized the [most participated web 3 art and cultural](#) event with over 700+ people in attendance.
- Collaborated and partnered with leading blockchain & web 3 communities in Africa to educate over 500+ newbies on web 3 education.

Our first milestone with Arbitrum is to organize Dapps over Apps conference 2.0 with an estimated budget of \$10,000

## Budget Breakdown:

- Venue - \$1,000: A conducive for 2,000+ attendees
- Welfare package for educators - \$1,000: For educators and speakers.
- Prize for hackathon winner - \$1,000: Prizes will be share among 2 - 3 winners based on their solution built on Arbitrum.
- Refreshment: \$2,000: \$2 per head for 1,000 guests.
- Promotion: \$700

- Videography & photography: \$800
- Workers and volunteers: \$700
- Remuneration for key team members: \$2,000
- Prints, Banners & backdrops: \$400
- Customized cloths, swag packs: \$400

Total: \$10,000

## Program structure:

- Duration

: A 2-day global blockchain Conference

- Target audience:

2,000+guests consisting traditional developers, creators, project founders, government stakeholders and web 3 enthusiasts.

- Educators & Speakers

: 30+

- Location:

Lagos, Nigeria

- Tentative Date:

December 2023

- Agenda:

Onboarding traditional developers and creative builders to web 3

- Sessions:

Workshop, Hackathon focused on building real-life solutions, Panelist.

## KPIs & Deliverables:

- Educate 500 - 1,000 developers on how to build decentralized

application on Arbitrum.

- Organize Arbitrum's largest web 3 conference in Africa with over

2,000+ attendees.

- Create awareness for Arbitrum blockchain technology to at-least 40%

of 85,000 developers in Nigeria.

- Organize 2 workshop sessions focused on building with Arbitrum

blockchain technology for traditional developers and newbies.

- Organize hackathon focused on creating real life solution utilizing Arbitrum blockchain infrastructures.

- Running database of 1,000+ developers, tech enthusiast and creatives

builders in Nigeria.

- Establish a community of Arbitrum builders and web 3 enthusiasts.

- Invite government officials and stakeholders to learn about blockchain

technology and how it can solve immediate Africa problems.

- Personal mentorship, community building and training for developers

and attendees after the conference

## Core Team members:

- Abdulkareem Oyene: A web 3 advocate with 37 months experience in blockchain network development and community building. He has worked with Near protocol and helped them onboard over 1,500+ active users and facilitated wallet and on chain transactions.

Furthermore, he founded a community; Near x art which focuses on onboarding creative to web 3 and charitable contributions via the use of blockchain technology and web 3 tools.

His passion for a decentralized world made him start the Dapps Over Apps movement that aims to onboard traditional developers and web 2 builder to build with blockchain infrastructure.
