

Hi everyone,

I was wondering why we are using an outside domain for our staking platform ApeStake.io, instead of the official ApeCoin domain. I noticed that a simple Google search brings up other domains offering staking services, such as ApeCoinStaking (dot) io, and I'm not sure if they are legitimate. This could potentially lead to more scams and risks for our community. While I understand that LP can be from different platforms, it would make sense to have everything on the same domain as ApeCoin, which is apecoin.com.
