

Hello Everyone,

I have a nestJS project with noir_js & backend_barretenberg V0.19.4

I can generate a proof but I can't verify it.

```
const proof = await noir.generateFinalProof(inputs); const verify = await noir.verifyFinalProof(proof);
```

Here is the error:

```
'RuntimeError: unreachable\n' + ' at null. (wasm://wasm/010be49a:1:4210546)\n' + ' at null.
