

# Genesis Epoch

The loyalty program will start with a Genesis Epoch (Epoch 01). The genesis epoch starts before the token generation event (TGE) of the SYNC token and will keep running until after the TGE is completed (the full launch).

The purpose of the genesis epoch is to bootstrap the early incentive for traders and potentially increase the earning of liquidity providers before the SYNC token is available.

## Details

Totaling 900,000 SYNC tokens will be allocated for the genesis epoch of the SyncSwap loyalty program.

The genesis epoch will last for 30 days, starting on April 10th 15:00 (UTC+1) and ending on May 10th 15:00 (UTC+1).

- Total rewards - 900,000 SYNC (0.9% of total supply)
- Genesis epoch duration - 30 days
- Start date - April 10th 15:00 (UTC+1)
- End date - May 10th 15:00 (UTC+1)
- 

Rewards will be distributed in veSYNC.

## Eligible tokens

The genesis epoch will start with a few eligible tokens that have sufficient liquidity, since there are not many tokens available on the zkSync Era mainnet at this moment.

The eligible tokens are

- ETH
- USDC
- USD+
- BUSD (Celer Network)
- 

Considering the available liquidity, recommended pools are

- USDC-ETH Classic
- USDC-USD+ Stable
- USDC-BUSD Stable
- 

## How to participate

Start trading eligible tokens to earn ySYNC and share the SYNC rewards!
