

TLDR :

Event scheduling for Regional Ape communities

Ask → 0 \$ APE - 1500 \$APE (TBD)

This will be entirely free for the participating communities, no hidden fees. Will cover all the costs associated with the software side of things for a year or more.

Status → Live

Rationale

Coordinate events lead by community members within the sub communities within the ApeCoin DAO (French apes, Canadian apes, Chinese apes, Goofy Apes, Bri'ish Apes , Trait specific apes etc)

This way we can empower fractured collectives and help them not only coordinate events within their communities but also across different sub communities as well (ex : French x Canadian Apes). This further helps bring the community together and strengthens the existing bonds.

This AIP is an extension of this calendar which tracks spaces events within the DAO → [Tracking Events within the ApeVerse with A.C.T. \(ApeCoin Tracker\)](#)

Note : The backend for this (Phase 1) is already operational. Will open it up to the communities in the pilot stage (Mention me down here for access)

- Phase 1 keeps all the different community events in a unified calendar
- Phase 2 will take about a week or two to become fully operational. This'll happen about 2-3 weeks before it goes to vote on snapshot.

Process of event submission :

1. Community members can create events which get synced with all other

Form to submit community led events : [Event Form](#)

1. Sync's the calendar with the db and reflects changes made within 5 minutes.
2. ???
3. Profit

Advantages :

- Will act as a database for other projects to fetch events from for their custom implementations.
- Leverages the native functionality of the OS you're using (iOS, android, microsoft) by tying natively into calendar apps for notifications (Exploring additional functionality)
- Includes link to the DB entry where we can include things such as Key Takeaways, Agenda and whatever our heart desires

()

Workflow for that thingy →
