## About Me

Previously, I led the StableLab delegate team that spanned over 15+ DAOs, personally actively engaging in various DAOs including [Optimism](#) and [Balancer](#), among others.

Since becoming a delegate in early 2022, my extensive involvement across multiple DAOs has afforded me valuable insights into the prevalent challenges faced. My experience spans beyond being a delegate, having served on DeFi Committee A at Optimism, Optimism badge holder since RPGF 2, participated in the GSC at Element Finance, and contributed to the grants council at Compound.

I plan to use that experience to support Uniswap DAO in various ways possible, as a delegate, participating in working groups, and other opportunities that arise. Moreover, I have been an active contributor to the Uniswap DAO through various discussions and working groups like the Uniswap Delegate Reward WG and Gas Rebate discussion.

## Delegate Communication Intent

I intend to regularly update the community, ensuring transparency and providing comprehensive insights into my decision-making process.

## Possible Conflicts of Interest

I currently work at UMA & Across and am an active governance contributor to Arbitrum DAO.
