

Seed Phrase Module - tKey JS SDK

[@tkey/seed-phrase](#)

â

The Seed Phrase Module helps you to store and use seed phrases on the metadata.

Installationâ

- npm
- Yarn
- pnpm

npm install --save @tkey/seed-phrase yarn add @tkey/seed-phrase pnpm add @tkey/seed-phrase

Initializationâ

```
import
{
  SeedPhraseModule
}
from
"@tkey/seed-phrase" ; const seedPhraseModule =
new
SeedPhraseModule ( ) ;
```

Usageâ

With theSeedPhraseModule , you have access to the multiple functions as mentioned in the type reference, however, the most important ones are:

Set Seed Phraseâ

setSeedPhrase(seedPhraseType: string, seedPhrase?: string): Promise;

- seedPhraseType
- : The type of seed phrase to set.
- seedPhrase
- : The seed phrase to set.

Exampleâ

```
await tKey . modules . privateKeyModule . setPrivateKey ( seedPhraseType , seedPhrase ) ;
```

Get Seed Phraseâ

getSeedPhrases(): Promise;

Returnâ

- Promise
- : A list of seed phrases.

Exampleâ

```
await tKey . modules . privateKeyModule . getSeedPhrases ( ) ;
```
