

minTokenSaleAmount()

...

Copy function minTokenSaleAmount(Token token) external view returns (uint128);

...

Once new funds are added to the auction using the execute() function, there is a check whether to reset the price or not.

minTokenSaleAmount is defined as half the contract updated balance (available for sale).

Example

...

Copy minTokenSaleAmount(0xC02aaA39b223FE8D0A0e5C4F27eAD9083C756Cc2) returns (5215367497312276769;)
