

This message is a notice to [@Aligned\\_Delegates](#) and other members of the Maker Community. Our Executive, originally scheduled for today, is going to be postponed.

We intend to present the executive for voting no later than the end of the day on Monday, October 16th, but if we can safely manage to complete the process earlier, we'll aim to post it before Friday.

The reason for this delay is the addition of several new topics late in our executive cycle and the longer-than-expected time it took to verify recurring items on the Governance Facilitator side. I take full responsibility for this delay, but it's not considered a critical issue. It's part of the growth process and involves dealing with some unforeseen challenges that we've learned from and will address more effectively in the future.

Thank you, all. I welcome any questions below.
