

Hello everyone,

Im the founder of Algalon AI, an AI DeFi platform on Arbitrum.

Introduction:

Algalon AI is an AI platform that provides a wide range of generative artificial intelligence (AI) tools to support the blockchain industry. Our mission is to lead the AI industry for crypto projects, by making the DeFi accessible to everyone.

Algalon AI Stage

Algalon AI has a very engaged community, with respected presence in Twitter, TG, Discord and Crew3. Product wise, we are ready to launch the first product, the AI Swap

- an AI Swap chat based integrated to top DEXes and in the future will provide more DeFi option like Lending, Farming, LPs and heading to Perpetual trading.

1.5K

We are heading our token launch in the following days\weeks and immediately with the product will be live for everyone to use on Arbitrum (and on other chains).

Our Proposal:

In light of the nature of our business, our main revenue streams generated by trading fees (and subscriptions for future products). We would like to offer a fix rev-share of 50% fees to GMX Governance generated in our platform from Perps transactions. In return, Algalon AI will have GMX formal partnership support and starting a due diligence process for \$AiFi token listing with preferred terms if are met.

Thanks and looking forward to hear your thoughts.
