

Dear Aavengers,

I'd like to initiate an opinion poll regarding the topic concerning the listing of the following tokens as collateral options in AAVE:

OMG, UMA, RenBTC, LRC.

All these tokens benefit from healthy liquidity while their underlining projects have consistently added value to the DeFi ecosystem.

In this sense let's express our vote in the poll below in order to kick-off any potential listing.

- Yes for UMA listing
- No for UMA listing
