

Hello dYdX community,

At TienThuatToan, we have a dedicated team of five professionals with extensive expertise in blockchain technology. Additionally, our engineering team has been deeply involved with blockchain infrastructure deployment and maintenance for over 4 years. Their combined knowledge, skills, and experience enable us to confidently handle your technical requirements and deliver top-notch node services.

We are currently validating more than 10 different chains with 99% uptime, backed by modern structured monitoring services and the many tools that are customary.

Entity name and Location

: TienThuatToan, Vietnam. [Vietnam](#) is where people put the biggest share of their money into cryptocurrency, according to a study by U.S. blockchain data platform Chainanalysis.

Infrastructure location

: Multiple cloud-based and dedicated servers with different service providers.

Type of hardware we run

: We use dedicated servers at the data center and cloud servers for our sentries. The sentries are located in Singapore, Japan, Germany, etc.

Team:

2 DevOps engineers.

Years of experience

: Validating since 2019.

Best Practices:

suitable monitoring and alerting systems, highly secure key management, and extra backup data

Voting Framework

: When there is an ongoing proposal, each team member looks out for the further details that are needed to get a better view of the proposal in question. After the time provided for the team to think through and come up with some ideas as well as arguments supporting them, we come together and have internal discussions for every proposal. The discussions go on as long as we come to the same decision about whether to vote for or against the proposal.

Additional roles:

We can run IBC-relayers, RPCs, snapshots, etc.

Other contributions to ecosystems

: We have the advantage of community development. Currently, we have more than 100,000 members on social networking sites such as Facebook, YouTube, Twitter, Telegram, etc.
