

I got the following error on macOS when compiling a SC with the extern crate "tflite" which accessed from local storage. When building only the crate the error does not happen. Any ideas what module could cause the error?

error: failed to run custom build command for tflite v0.7.0 (/Enigma/extern\_crates/tflite)

Caused by:

process didn't exit successfully: /Enigma/secret\_contracts/simple\_addition/target/release/build/tflite-9a7a854401392085/build-script-build (exit code: 101)
