

## LEGO Nominees update

As we mentioned in the [Q3 2023 LEGO Report](#), unfortunately three nominees had to resign due to lack of resources to continue participating in LEGO. JK, Felix, and Will, thank you for your contributions to decentralized liquid staking!

Fortunately, longtime contributors to the Lido DAO have expressed a desire to join this initiative in order to be able to give grants to other teams doing great projects in their area of expertise. LEGO council who [manages this committee expansion](#) reviewed candidates and by majority of council votes decided to onboard:

- [TheDZhon](#) (0x97D09b6A8Bb0Da8f913c4d35857338Ce6b2999c0) - one of early Lido on Ethereum devs ([TheDZhon](#) [\(Eugene Mamin\)](#) · [GitHub](#))
- [Irina](#) (0x53122D71e7F8930e7282F840f9897E37E3c10C78) - Lido on Ethereum protocol analytics contributor

It is our hope on the LEGO Committee that this addition will increase the momentum of grant making for projects that improve the ecosystem of the Ethereum liquid staking.
