

I entered in crypto space in start of 2020. i found it so interesting that i Leave my 9 to 5 job to learn and work on crypto. As uniswap was and also today is the biggest DEX i have few transactions on it before The Airdrop too from 2 of wallet addresses Having not much knowledge about Rug pulls and scams in crypto i loss all my UNI Airdrop and also my own hard earned money.

I just hope that Uniswap V3 can come up with the solution of rug pull events making decentralize finance more secure for the new comers when they enter in crypto space.

These are my wallet address which recieved UNI Airdrops and then lost all to the Scammers/ Rug Pulls. You can find Tokens i bought in these wallets on etherscan and Rug pulled by their teams

and creators addresses also of those Scam Tokens.
