

Crypto Deposits API

[Suggest Edits](#)

Move Money On-Chain

Circle Mint customers can use the Crypto Deposits, Crypto Payouts, and Accounts APIs to manage their Mint account in a programmatic way.

- Accept crypto deposits
- : Accept USDC and other digital asset payments via supported blockchains.
- Make crypto payouts
- : Send fast, low-cost crypto payouts to your customers, vendors, and suppliers.
- Manage account balances
- : Create and manage USDC, BTC, and ETH balances for your global customer base with our flexible, reliable accounts infrastructure. Please note that this API is available on a limited basis.

Note:

This API is available at an additional cost and require further solutioning with our team in order to best meet your organization's needs. If interested, please contact your Circle representative or [\[email protected\]](#) for more information.

Crypto Deposits API

The Crypto Deposits API allows you to accept [USDC](#) and other crypto deposits from your customers.

With the Crypto Deposits API you can:

- Take USDC, ETH, and BTC payments directly through on-chain transfers.
- Easily manage reporting and reconciliation through the use of payment intents.

Accounts API

The Accounts API allows you to easily create and manage accounts and balances for your customers. Use it to execute transfers of funds across accounts within your Circle Mint infrastructure. This API is only available on a limited basis.

Our API eliminates the complexity usually associated with custody and security of digital assets, blockchain address management, and transaction fees.

With the Accounts API you can:

- Embed US Dollar-denominated accounts into your product or service without the hassle of legacy bank account structures.
- Manage multi-asset accounts infrastructures for your customers that offer seamless fund transfers, including hosted accounts and on-chain [USDC](#)
- connectivity.
- Manage customer accounts across 150+ countries.
- Benefit from Circle's extensive experience supporting over 10 million digital account customers, 5B in digital asset custody, and hundreds of billions of dollars in transactions.
