

Wonderland is a group of developers, researchers, and data scientists with one thing in common: we all love building cool sh\*t. DeFi sucks, but we're here to make it better.

We're partners with some of the most relevant and successful protocols in web3, including Optimism, The Graph, Aztec, Balancer, Gitcoin, Connex, and more.

We're posting this message to let you all know that Wonderland is in the house! We're here to review and craft Spark spells, and contribute on as many fronts as we can to make the Maker ecosystem thrive! We're stoked about this partnership. We

Maker.

[@0xshaito](#) (username for GitHub, Discord, and this forum) will be in charge from our end. Other Wonderland team members might be added in the future.

Let's go!
