

Heya Folks -

[@Jonas](#) suggested I share Carl's latest post on the RPGF3 distribution data here to get more Badgeholder's eyes on it. Key takeaway is that the top sequencer revenue generators received a whopping 1.5M OP of the 30M of RPGF3. That is 5% to the top builders who are creating demand for blockspace which is what will fund public goods.

I've been quite vocal in flagging that sends the absolute wrong signal to the ecosystem's most critical constituency and if not mitigated quickly will likely have a chilling effect on ecosystem growth.

[@wagmiAlexander](#) Update:

Just ran the numbers and the top 20% of RetroPGF projects in terms of sequencer fee contribution earned a combined 1.5M OP (5% of the pool).

ERC 4337 (AA) was the one project that stood out. The remaining 15 protocols all received <100K OP.

One explanation might be... [twitter.com/i/web/status/1...](#)
