

Changed UI

At the same time, 2 functions were removed.

1. It is now impossible to see how much Funding has been accrued
2. Before opening a position, as well as during an increase, it is not visible how the liquidation level will change.
3. I don't see my orders in the order book in 9 out of 10 cases, they are not displayed.

You go to the bottom in the V4 interface compared to V3.

Make it possible to select an interface as in version V3.
